## IMPORTANT HINTS TO PROLONG THE LIFESPAN OF YOUR DOOR:

- Doors need to be sealed on all surfaces and edges with appropriate coatings. Do not remove the plastic wrappings or other packaging from the door until it is use.
- Doors should be stored on a level surface (never on edge or on end) and kept clear of the floor on three level or bearers. The bearers should be longer than the width of the doors.
- Exposure to ultra violet light can cause fading or discolouration of timber veneers on the door face. Thus, it is recommended to store the doors at shaded area.
- Ensure that the moisture content of the wood is kept close to the level to it which was when the door was manufactured.
- Internal doors must be conditioned to the service conditions before fixing. They must be protected from abnormal heat, extreme dryness, humid conditions or sudden changes of temperature or humidity.
- Prefinished doors should retain their protective packaging until the latest possible time, ideally until after internal decorations have been completed.
- Glazing rebates and backs of beads should be sealed with an appropriate sealant. Ensure surfaces and edges are in good condition before applying finishing coats.
- It is important that all surfaces of doors are painted. Treat the end grain and ensure that good treatment is applied to all surfaces. Pay close attention to top and bottom edges; cut areas for lock and hinge housing and holes of latter plates.

## 2 YEARS WARRANTY\*

HUSKEY Products are guaranteed by HUSKEY NUWOOD SDN. BHD. (herein referred to as "the manufacturer") for two years from the date of shipment to be free from defects arising from faulty workmanship or materials, subject to the following conditions:

1. Doors are to be installed and maintained according to the manufacturer's recommendations, and are not to be subjected to misuse, abuse and negligence.
2. Doors that have become defective arising from the failure to follow these condition, and that have been subjected to shipment or storage hazards after they have left the control of the manufacturer shall not be covered by this warranty.
3. Doors are to be inspected upon arrival for visible defects, and any claim arising thereon must be notified to the manufacturer within fourteen (14) working days.
4. The manufacturer shall not be liable for any additional charges of installation and finishing cost, or other charges including incidental cost, arising from the replacement of doors.
5. Repairs are to be carried out only by the manufacturer and its appointed agents. There will be no reimbursement for any charges incurred for the repair or replacement of doors without the prior written consent to the manufacturer to such repair and replacement.
6. Claims under this Warranty are to be made within one (1) month of the discover of the defect.
7. Breakage of glass except arising from faulty workmanship or material, shall not be the responsibility of the manufacturer.
